Personal Expense Tracker - ExpenseTrack

Personal Expense Tracker (ExpenseTrack) web application can be used to reduce the manual calculations for daily expenses and keep track of expenditure. In this application, user can provide his income to calculate his total expenses per day and these results will nbe stored for unique user. To use this application, the user must first register on the system. For the next uses, he can login manually or just save his credentials on the system to avoid repeated logging in. This personal expense tracking application also generates a report of user's income and expenditure based on his past income and expenditure data available. User can use these reports to track from where he/she is getting more income and also where the user is spending more. These reports help user to analyze if he/she is over-spending money. The income and expenditure pages ask the user to mention in which category the user is gaining or spending money along with money and desciption. It includes default categories like food, rent, sports, theatre, birthdays, etc. It also includes others option in the category section which the user can use to mention his/her own category. This application will eliminate the use of books to keep track of finance and confusion involved with it.

Personal Expense Tracker web application helps user to manage his/her expenses more effectively.
